Reduce the Risk of Human Errors

In light of the high costs associated with training Direct Support Professionals, Aglet Solutions™ created I-TRAIN™. This innovative and exciting approach to DSP training has been designed to allow the most accurate training to employees while making it cost effective for Providers.

This out of the classroom tutorial will engage trainees in the knowledge they need to proficiently carry out the significant duties of their job. We invite employees and employers to experience the power of this online training program.

Through interactivity and the ability to easily navigate the training modules, employees will have all of the information needed to succeed at their fingertips. I-TRAIN™'s goal is to equip Direct Support Professionals with the content needed to accurately carry out their job duties and the empowerment to take that comprehension to make a difference in the lives of those they serve.
